*Implementing integrated stormwater management solutions requires community-centered plans, which can be developed through community organizing.*

Community Organizing

*Community members working together to make change within their communities.*

- Map Assets and Power Networks
  - Identify important community institutions (Churches, schools, block clubs, & other social organization)
- As community members, we collectively start to identify not just challenges, but also strengths and opportunities.

Building Power & Community Platforms to...

- Identify Community Specific Solutions.
  - Ensuring multiple community benefits.
- Influence Institutions and Policy
- Develop Systems of Mutual Aid
  - (e.g. social support systems during/post disaster events). These can operate independent of government policies/ actions or in concert.
