

# Civic Innovation Hub I

## Session 3: Asset Mapping

Mateo Baker | Urban Resilience

# CNT

### Key Words

#### Asset Mapping:

*A community's assets are specifically identified, described, and visualized on the map.*

#### Community Assets:

*Any institution, organization, group, location, or space that community members value because it is a resource for members.*

#### Mutual Aid:

*Groups or systems that provide support to community members and can operate independent of government policies/actions.*

### Potential Outcomes of asset mapping:

- Stronger ties among community organizations
- Increased mutual aid among organizations
- Collaborative events (e.g. sustainability bike rides from garden to garden) increasing awareness of each initiative
- Increased momentum to directly build on identified interests and assets (e.g. involvement in community sustainability efforts and more focused direction for heritage farming and healthy eating)

### Community Asset Map Created by Robbins Civic Innovation Hub Cohort
