

Workshop Objectives:

- Review shared commitments about how we will interact
- Review workshop goals and agenda
- Participants build from a sense of shared commitment and develop in their ability to collaborate with one another
- Participants develop in understanding how to collaborate with their municipalities and other stakeholders on stormwater management
- Participants begin to identify a capstone project and think through potential assets and challenges

Workshop Schedule

6:10 pm	Facilitators join webinar	<ul style="list-style-type: none"> ▪ Technical troubleshooting ▪ Last-minute check-ins 	15 mins.
6:25 pm	Slide 2 - Start webinar	<ul style="list-style-type: none"> ▪ Admit and welcome participants to webinar ▪ Welcome slide ▪ Appreciate everyone for the robust conversation last month, point out that in reflecting something that came to front of mind is how limited local municipalities are in being able to address these issues without considerable additional support. Something we will think a lot about today is who is willing to stand with residents in developing shared solutions. IDing those actors and then developing strategies that incorporate those players. 	5 mins
6:30pm	Set guidelines +	<ul style="list-style-type: none"> ▪ Zoom basics ▪ Slide of basic commitments ▪ Purpose of CIH - so pressing as we saw with all of the recent storm events. 	3 mins
6:33 pm	Overview of workshop approach	<p>We are going to be talking about next steps after our recent rain events, doing some review of materials we have covered so far, clarifying how all of the maps work together, and then digging in within our municipal groups in identifying a shared capstone project.</p> <p>We will have a mix of presentations, small group conversations, and discussion with the larger group.</p>	2 mins

6:35 pm	Brief reflection - open discussion	Biden approval of Illinois disaster declaration - what does this mean for our communities?	8 mins.
6:43	Slide Deck - Review of maps + stakeholders handout	Brief review of topographic wetness map (add FEMA flood zone and asset maps?) Reference cheat sheet hand out of stakeholders, agencies, governments, and funding sources.	10 mins
6:48	Slide deck - review of capstone project	Reviews capstone project goals and examples Allow time for Q&A	5 mins
6:53 pm	Breakout Room 1	Small Groups by municipality: Identify community assets and strategies for the capstone project. Work through steps 1-3 of the Rapid Vulnerability Assessment Use this link to share screen and record notes from the discussions. Do not share this link with participants, to avoid accidental deletions.	25 mins.
7:18 pm	Shareback	What assets did you identify? What strategies did you come up with? Did you come to consensus? Did you identify any challenges to realizing these goals?	10 mins
7:28	Breakout Group 2 SETUP	Set-up next breakout: a reiteration of the limitations of municipalities, this is one of many vulnerabilities that are both socio/economic/political but also have to do with infrastructure. We'll think more about our strategies in this next session. Think about some obstacles that surfaced in our asset mapping, and also look at some additional data sources.	2 mins
7:30 pm	Breakout Group 2	Based on the strategies that you've identified, do you think that you'll run into setbacks due to municipal capacity or lack of assets? Work through step 4 of the worksheet in your group.	15 mins
7:40 pm	Shareback	What obstacles do you anticipate for your capstone project?	10 mins

		How can we support you in working through these obstacles?	
7:50 pm	Wrap-up/ Reflection	<ul style="list-style-type: none"> ▪ Field Trip date & time ▪ Next steps: data sources review and how this can impact your capstone project ▪ Gratitude and thanks ▪ Reflection 	5 min.
8:00 pm	End Webinar
